## **Industry Report: Kansas City Workforce**

Think of the Detroit economy, and you think about cars; think about Houston, and you think oil and energy; in Los Angeles, it's the entertainment industry. But when we think of the Kansas City economy, no one industry comes to mind. That is because we have such a diverse mix of industries, with no single one dominating.

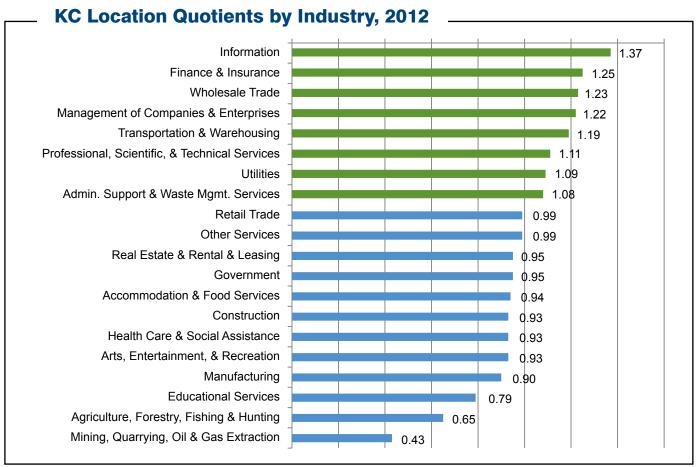

In some ways, this might be one of Kansas City's greatest strengths. Our workforce has always been adaptable, and our diversity helps us weather economic ups and downs. From the 19th century, when our transportation routes supplied westward expansion, to the 20th century, when we built a strong manufacturing base, and as we move into a more knowledge-based economy in the 21st century, the adaptability of Kansas City's workforce keeps the economy running strong.

Source: Economic Modeling Specialists, Inc. (EMSI)

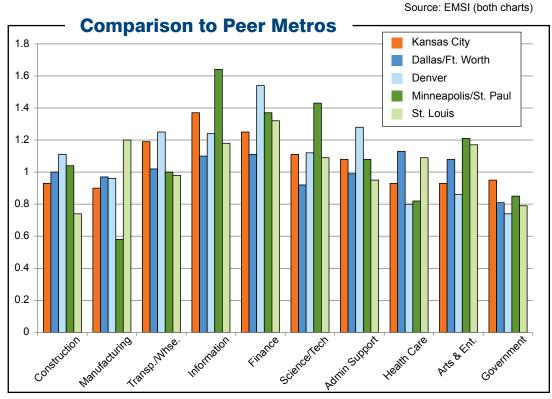

Even though no one industry dominates Kansas City's workforce, we do have some industries in which we specialize. The location quotient measures the level of specialization a region has in a given industry relative to the nation, with any location quotient greater than one indicating a greater specialization in that industry.

Kansas City has the highest location quotient in the information industry, which includes telecommunications. We're also strong in the finance, wholesale trade, management and transportation industries.

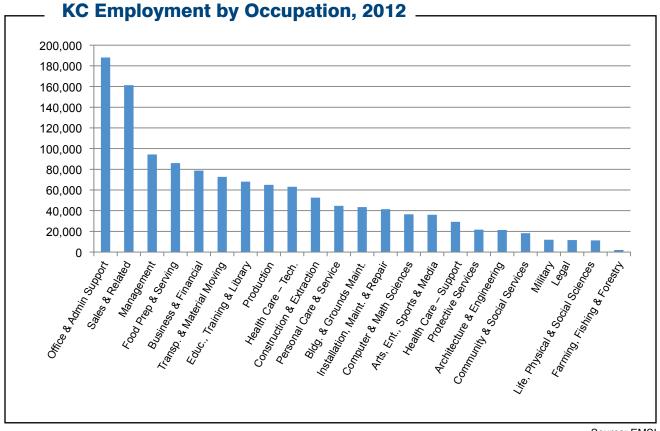

Kansas City has a higher location quotient than its peer metros in government, and stacks up well in information, finance and transportation.

Look at some of the companies headquartered in Kansas City — such as Sprint, American Century, H&R Block and YRC Worldwide and this comes as no surprise.

While the mix of industries in a region can tell us a great deal about its economy, it doesn't tell us what workers actually do on a daily basis. This chart breaks down the Kansas City region's 1.25 million jobs into broad occupation categories.

What jobs are growing the fastest? This table shows the top 10 fastest-growing occupations in the Kansas City region in 2012. For more on growth jobs, see our "Top 30 Fastest Growing Jobs 2011-2012" and projected "Top 30 Fastest Growing Jobs 2012-2017" reports at **kcworkforce.com**.

| Occupation   | 2011<br>Jobs | 2012<br>Jobs | Net Job<br>Growth* | Job<br>Openings* | 2011 Median<br>Hourly Wage |
|--|--------------|--------------|--------------------|------------------|----------------------------|
| 1. Financial specialists                             | 37,554       | 38,771       | 1,217              | 1,874            | \$20.08                    |
| 2. Health diagnosing and treating practitioners      | 38,360       | 39,343       | 983                | 1,698            | \$39.16                    |
| 3. Sales representatives, services                   | 23,956       | 24,707       | 751                | 1,456            | \$20.09                    |
| 4. Business operations specialists                   | 39,236       | 39,969       | 733                | 1,623            | \$25.82                    |
| 5. Computer specialists                              | 34,502       | 35,217       | 715                | 1,349            | \$30.71                    |
| 6. Other management occupations                      | 54,608       | 55,266       | 658                | 1,918            | \$17.36                    |
| 7. Food and beverage serving workers                 | 46,739       | 47,380       | 641                | 2,463            | \$8.40                     |
| 8. Nursing, psychiatric and home health aides        | 17,529       | 18,145       | 616                | 806              | \$11.20                    |
| 9. Primary, secondary and special education teachers | 36,571       | 37,173       | 602                | 1,487            | \$24.48                    |
| 10. Financial clerks                                 | 34,075       | 34,644       | 569                | 1,330            | \$14.65                    |

Source: EMSI

Again using the location quotient calculation, we can see which occupations the Kansas City area specializes in, relative to the nation. Kansas City has a higher level of specialization in computer, math and science; business and financial; and architecture and engineering occupations
